

TOM DI MINO

AI WRITER & CONTENT STRATEGIST

Portfolio: www.minoanmystery.org

Email: contact@tomdimino.com

Address: Rosendale, New York

ABOUT ME | Sr. Tech Writer with startup and Big Tech experience, a love for language, and 10+ years of UX copywriting, content strategy, SEO, instructional design, and user research.

WORK EXPERIENCE

AI UX COPYWRITER (Freelance), Minoan Mystery

Dec 2023 – Present (Remote in Rosendale, NY)

With my LLC, I consult for the Google AIUX and RAI teams as an independent vendor.

- Interview design and UX leaders from the Google AIUX and RAI teams and promote thought leadership in GenAI.
- Digest learnings from Google AI teams into bite-sized PRs and blogs which are published externally and internally across multiple channels.
- Pitch new pieces and topics to the Content Strategy Manager, and edit the submitted drafts of fellow UX writers.
- Develop prompt engineering curricula for the Gemini class of LLMs geared toward casual users, and builders at the API level.
- Write video scripts for individual prompt engineering lessons, and use LLM to generate repository of examples.

SR. CONTENT DESIGNER (Contract), Google

June 2022 – October 2023 (Hybrid in Manhattan, NY)

Google, and its parent Alphabet, helm the world's largest search engine and video library, shaping how we interact with the Internet and emerging AI tech.

- Designed a full curricula of lessons, coded with Markdown and HTML/CSS, for Googlers advancing their soft and technical ML skills.
- Distilled research findings into 4 distinct learner personas, informed by a 6-month, skills-based user study involving 250+ Googlers.
- Collaborated on a 'learning design playbook' disseminated Google-wide.
- Built a content curation tool compatible with GPT 4, Llama 2, and Gemini LLMs in TypeScript.
- Conducted interviews with 30+ L&Ds, TPMs, and SWEs from a multitude of product areas, as they prototyped upskilling lessons.
- Audited and redesigned the internal Google mentorship platform serving 22k+ employees, leading to a 25% rise in launches from Q3 '22 to Q3 '23.

SR. CONTENT DESIGNER (Contract), Chan Zuckerberg Initiative

November 2021 – June 2022 (Remote)

CZI is a philanthropic sister organization of Meta, devoted to making education and open-source scientific tech more accessible around the world.

- Co-led the "Bravo Cohort" project to design and develop online learning materials for an open-source image analysis platform.
- Collaborated with 9 application scientists, a staff UX researcher, product manager, and SWE to launch our project MVP in less than 6 months.
- Audited napari.org and the napari hub, integrating existing UX research; managed updates to sites using Airtable and GitHub issues and PRs.
- Sketched and developed UI wireframes for a "plugin collection" feature of the napari hub, working in Figma and Notion.
- Deconstructed over a dozen competitor learning platforms, synthesizing this into design recommendations for CZI Imaging Tech as a whole.
- Published a full course on GitHub using Jupyter Book, Jupyter Notebooks and narrated videos. Coded entirely in Markdown and HTML/CSS.

EDUCATION

The College of New Jersey

2007 – 2010

Studied Microbiology as my major, Classical History as my minor—exposing myself to Latin, Ancient Greek, Spanish, Italian, French, and Arabic.

Colts Neck High School

2002-2006

Received the highest score in Language Arts Literacy (278) for my class on the HSPA. Won 1st place for Digital Art at the 2004 TSA.

HOBBIES

Traveling: Wherever I go, I immerse myself in local history, cuisine and languages.

EXPERTISE

Branding

AI/LLMs

Data Analytics

SEO/SEM

Creative Writing

Technical Writing

HTML/CSS Design

Project Planning

SR. CONTENT STRATEGIST (Contract), Hugo & Cat

June 2021 – November 2021 (Remote)

Hugo & Cat is a top-50 award-winning digital marketing agency with past clients like Microsoft, Salesforce, Johnson & Johnson, and Sony.

- Performed a comprehensive content audit for the American College of Surgeons—focused on patient-facing, and surgeon-facing microsites.
- Participated in cross-functional design sessions (e.g. Crazy 8's on Figma), iterating upon mobile UIs and on-page copy for multiple userflows.
- Conceived and prototyped 3 experimental voices and tones for the ACS site, culminating in content creation guidelines for the brand.
- Defined a new taxonomy for the redesigned FACS.org, expanding upon stakeholder interviews, user testing, and UX research.
- Within 9 months, ACS saw a 40% increase in member applications and a 42% increase in average user session duration.

SR. CONTENT STRATEGIST (Freelance), Magellan Health

April 2021 – June 2021 (Remote)

Magellan Health is a leading healthcare company developing a digital platform for members seeking behavioral health resources and support.

- Conducted stakeholder interviews and user research to understand pain points and goals for Magellan's prototype mental health app.
- Analyzed competitors to inform the design of member journeys, noting best practices for activation, assessment, and re-engagement.
- Synthesized research findings into actionable design recommendations, and a complete UX flow (with UX copy) for Magellan's MVP.

TECHNICAL CONTENT STRATEGIST (Freelance), Valtech

May 2020 – June 2021 (Remote)

Valtech is a premier international marketing agency that specializes in data science, UX, and AR technologies. Clients include Dolby and Audi.

- Devised a new information architecture for AONA, a non-profit surgical institution; and IMA, a continuing-ed accounting association.
- Collaborated with a UX designer to create sitemaps, content blocks, and mid-fi wireframes, drawing upon customer personas and SEO analytics.
- Migrated Dolby Laboratories to the Sitecore platform, designing landing page and product page templates for desktop and mobile.
- Presented and updated clients via Microsoft Teams every week, winning approval from major stakeholders.

WEB CONTENT SPECIALIST (Contract), Hartz Mountain Corporation

November 2019 – February 2020 (Hybrid in Secaucus, NJ)

Hartz Mountain Corp remains the largest manufacturer and distributor of pet care products sold throughout the U.S.

- Performed housekeeping of 200+ Hartz pet products on their eCommerce platform, writing SEO headers, metatags, product descriptions, and blogs.
- Qualified a 100 long and short-tail keywords targeted to Millennial cat and dog owners, for paid and organic ad campaigns.

CONTENT STRATEGIST (Salaried), Renaissance Marketing

April 2018 – February 2019 (On-site in Philly, PA)

Renaissance is a B2B/B2C digital marketing agency that offers its own CMS-POS-CRM and eCommerce platform.

- Planned, wrote and edited eCommerce landing page copy and blog posts that consistently ranked on the 1st page of SERPs for primary keywords.
- Analyzed a dozen client sites with tools like Google Analytics and SEMRush, leading to over \$2 million in eCommerce revenue in less than a year.
- Composed 200+ pages of technical and UX writing for our CMS-POS-CRM platform, doubling the onboarding of clients in the span of 6 months.

NOTABLE PROJECTS

Mobile responsive portal & LMS for higher-ed

CampusCruiser

<https://tomdimino.com/Strata.pdf>

A vision of what higher-ed tech could be in the 21st century, my work on Strata & Knosys was deeply personal—born out of my own collegiate experience, rigorous research, and countless hours spent modifying my favorite PC games as an adolescent. The functional prototype that I constructed out of Material Design, clever use of CSS, and HTML widgets, impressed university IT admins, staff, and CIOs who had seen it all and always opted for the home-grown solution.

Dolby consumer & professional websites

Valtech

www.minoanmystery.org/portfolio/dolby

After developers had meticulously assembled a component library in Sitecore, I came onto their team to envision a sleek and mobile UX for Dolby Lab's consumer and professional websites. I audited and distilled their legacy site into 12 page subtypes, then built these page templates in Sitecore, consulting devs for QA and minor styling adjustments. Since 2021, my visual designs (pitched to the Dolby marketing team) remain in-effect across their live sites.

Open-source course on Python-based tech

Chan Zuckerberg Initiative

www.minoanmystery.org/portfolio/czi

As co-lead of Bravo Cohort, on CZI's Imaging Tech team, I helped to crystallize a learning platform, and onboarding materials, to guide research biologists specializing in Python-based image analysis. After planning and facilitating virtual workshops and co-design sessions via Mural and Zoom, we settled upon Jupyter Book as the ideal host for our project MVP. I applied what we gathered from competitive analysis of other ed-tech platforms, and the direct feedback from scientists in our cohort, to build and publish our segmentation course on GitHub, using Markdown and HTML.
